Welcome to GRIBOI 2016, the 26th Interdisciplinary Research Conference on Injectable Osteoarticular Biomaterials and Bone Augmentation Procedures. This event will provide an “East-meets-West” environment for experts from across disciplines and regions of the world to share cutting-edge insights into the future of injectable biomaterials.

Building on the success of our recent meetings, we will discuss ideas of both laboratory and clinical nature relating to the use of bone substitutes and other emerging applications of injectable biomaterials in bone augmentation procedures. This year, our topics will include truly prophylactic interventions, embolic materials, drug device combinations, and image guided interventions for degenerative disease.

We look forward to sharing an informative and fun event with you this year in Shenzhen!

CONFERENCE CO-CHAIRS
William Lu, Ph.D  KL Leung, MD  HB Pan, Ph.D
J Chang, Ph.D  G. Baroud, Ph.D  M. Bohner, Ph.D

CONFERENCE ORGANISERS
Shenzhen Institutes of Advanced Technology,
Chinese Academy of Sciences, China
&
The University of Hong Kong
